

ADAPTURE
RENEWABLES®

Secure the Future of Your Land

Collaborate with a dependable long-term partner to lease or sell land for solar energy and gain financial stability for generations to come.

A leading developer, owner, and operator of solar and energy storage solutions in the U.S.

Committed to Good Land Stewardship

Adapture Renewables is a leading solar developer, owner, and long-term operator at the forefront of today's renewable energy industry with an exceptional track record of delivering solar and energy storage projects across the United States from early project concepts to operation.

Adapture Renewables builds long lasting relationships rooted in trust. Our team is committed to being good neighbors by collaborating with landowners and their communities to develop solar and energy storage solutions that provide economic benefits. We are responsible stewards of the land through our careful planning of projects to minimize the impact on the land and natural habitat while building safe and productive projects.

Enhance the Value of Your Land with Local Partnerships

Adapture Renewables creates meaningful opportunities to harness the power of generational land and guarantee additional revenue streams. By partnering with us to sell or lease your land for solar projects, you'll be able to:

- Generate impactful income for you and your family
- Support your community when the project provides annual property tax payments during its operational life
- Power the creation of local jobs and investment in the local economy

GREEN MEADOW SOLAR

Why Partner with Adapture Renewables

Our team will work closely with you to develop a project that aligns with your priorities. Benefits include:

Competitive purchase or lease rates for your land

Long-term commitment as we aim to own and operate the project for its entire lifetime

Strong financial backing through our company, which is a subsidiary of KIRKBI – the private holding and investment company of the Kirk Kristiansen family founded to build a sustainable future for the LEGO® brand through generations

Good partnership which means working closely with local stakeholders, so everyone benefits

A proven track record with over 35 operating projects in our portfolio, helping meet energy needs in 11 states

Let's join together to power the future of your land and make renewable energy a reality in our communities. Our team of energy experts is proud to unite with you under a shared vision for preserving your land for future generations.
